BUS4066 - Contemporary Auditing: An Ethical Perspective (6 quarter credits). This course presents the nature and economic purpose of auditing by emphasizing the philosophy and current environment of the auditing profession. Learners develop and demonstrate their understanding of the stages and issues involved in planning and conducting a financial audit on various transaction cycles. Learners also examine the code of professional ethics as defined by the American Institute Certified Public Accountants (AICPA) and its influence on the auditing process and finance decisions. Cost $2,364*

BUS4065 - Income Tax Concepts and Strategies (6 quarter credits). In this course, learners build and strengthen their knowledge of fundamental concepts of individual, partnership, and corporate income taxation and tax-related transactions. Learners examine events that affect tax decisions, apply tax guidelines, and analyze tax forms. Cost $2,364*

BUS4064 - Cost Accounting for Planning and Control (6 quarter credits). This course emphasizes the role of cost and managerial accounting in the planning, control, and performance evaluation of business, government, and nonprofit organizations. Learners examine the theory and practice of business control and identify strategic aspects within business decision cycles. Cost $2,364*

BUS4063 - Advanced Financial Accounting Topics and Trends (6 quarter credits). In this course, learners analyze and apply advanced financial accounting concepts and consolidated financial statement information. Learners also evaluate the influence of global money markets and demonstrate knowledge of partnership and corporate accounting issues and governmental entities. Cost $2,364*

BUS4062 - Intermediate Financial Accounting Topics and Trends (6 quarter credits). Learners in this course develop and exercise a working knowledge of financial accounting theory and practice using Generally Accepted Accounting Principles (GAAP) and Financial Accounting Standards Board (FASB) pronouncements. Learners acquire financial reporting skills and apply financial statement conceptual frameworks to prepare financial statements. Cost $2,364*

BUS3061 - Fundamentals of Accounting (3 quarter credits). This course is an introduction to the accounting function in modern business organizations. Learners define accounting terminology and explore its application to accounting principles. Learners also apply accounting cycle strategies to business financial events and prepare financial statements from accounting system data. Cost $1,182*

MAT1050 - College Algebra (6 quarter credits). Learners in this course evaluate and perform linear, exponential, logarithmic, and other mathematical functions that include algebraic, graphic, and numeric properties. Learners then apply these concepts to the social and natural sciences, business, and everyday life. Cost $2,040*

MAT2001 - Statistical Reasoning (6 quarter credits). This course introduces fundamental concepts of elementary statistics, including descriptive statistics, methods of counting, probability distributions, approximations, estimation, and hypothesis testing. Learners use these concepts to apply and interpret statistical results. Cost $2,040*

BIO1000 - Human Biology (6 quarter credits). In this course, learners develop and demonstrate their knowledge of fundamental biological principles as they relate to human beings. Course topics include the molecular and cellular basis of life, genetics, organ systems, and the impact of nutrition and exercise on human health. The course also includes lab experience. Cost $2,040*

Please note:
- Financial aid is not available for single course learners. Contact an Enrollment Specialist for more information on payment plans and discounts.
- All undergraduate courses require a completed high school diploma or GED.
- Single course learners may apply credits from no more than three Capella courses toward a subsequent degree or certificate program.
ECO1050 - Microeconomics (6 quarter credits). Learners in this course examine the optimizing behavior of individual consumers and firms, the coordination of individual decisions through markets, and the evaluation of market outcomes in terms of efficiency and fairness. Learners apply microeconomic principles to real-world situations.
Cost $2,040*

ECO1051 - Macroeconomics (6 quarter credits). This course provides an introduction to fundamental macroeconomics topics, including national income analysis, unemployment and price stability, the business cycle, monetary and fiscal policy, and international trade. Learners study the behaviors of whole systems and economies and apply macroeconomic principles of economic theory to real-world situations.
Cost $2,040*

PSYC1000 - Introduction to Psychology (6 quarter credits). This course is an introduction to the basic principles of psychology and the scientific methods that psychologists employ. Learners build their understanding of the brain, learning and memory, personality, social influence, child and lifespan development, and psychopathology and apply concepts they’ve learned to everyday situations. Learners may earn credit for either PSYC1000 or PSYC1001, but not both.
Cost $2,040*

SOC1000 - Introduction to Human Society (6 quarter credits). In this course, learners use sociological theory and concepts to explore everyday life and gain knowledge of the ways individuals and society as a whole understand their collective social realities. As they examine cultural ideologies, learners are introduced to ways of objectively examining their personal perspectives on social issues.
Cost $2,040*

POL1000 - The Politics of American Government (6 quarter credits). Learners in this course study the fundamental workings of the American political system. Learners examine the ways constitutional structure shapes American politics and the ways political institutions and processes connect individuals to the larger political system.
Cost $2,040*

ENG3300 - Business and Technical Writing (6 quarter credits). In this course, learners write common business genres for a variety of purposes and audiences. Learners focus on principles of ethical, group, and supervisory written communication in the 21st century workplace.
Cost $2,364*

HIS3200 - History of Health Care in America (3 quarter credits). In this course, learners trace the evolution of the American health care system from the 19th century to the present. Learners assess issues related to health care access, utilization, resource allocation, and the role of insurance and gain knowledge of current medical treatment in the United States.
Cost $1,182*

POL2000 - Globalization (6 quarter credits). Learners in this course identify and examine the benefits expanding international economics and politics have provided individual countries and groups of nation-states. Learners also evaluate the forces guiding free market competition and rapid technological change and apply an understanding of the conflicts they generate concerning international environmental, national sovereignty, human rights, and citizenship issues.
Cost $2,040*

COM3700 - Conflict Resolution (6 quarter credits). In this course, learners gain an understanding of the factors that promote conflict and examine and practice applying the fundamental skills and tools used to resolve conflict in personal and professional situations.
Cost $2,364*

SOC3400 - Social Deviance (6 quarter credits). In this course, learners explore the fundamental concepts and theories of the sociological study of deviance. Learners evaluate deviant behavior from historical and social perspectives and reflect on contemporary issues involving deviance.
Cost $2,364*

PHY1000 - Introduction to Astronomy (6 quarter credits). Learners in this course explore the major concepts associated with understanding the universe and why objects in the universe behave the way they do. In particular, learners examine the history of astronomy and science; the concepts of modern astronomy and cosmology; the earth and the solar system; the sun, stars, and stellar evolution; galaxies and similar objects; and the Big Bang Theory and the origin of the universe. Learners also consider life on earth and the probability of life elsewhere in the universe.
Cost $2,040*

HIS4100 - Critical Aspects of American History (3 quarter credits). In this course, learners examine and explain how numerous formative historical periods throughout United States history influenced the country’s character and development. Learners assess how various wars in America’s history shaped the country, and evaluate historical and contemporary components of U.S. culture to determine their overall impact on current American life.
Cost $1,182*
