POLICY STATEMENT
Each Capella University course is identified by a unique, two-part course number. The first part, the subject, consists of a prefix and, when necessary, a designator; both are alphabetic characters. The second part is the numeric catalog number. A subject area is no more than four characters in length and a catalog number is four characters in length. Course numbers are established by the Academic Offerings Steering Committee and maintained by the Learner Services and Operations department and reflect the general subject area of the course, a specific type of course (if necessary), and the level of the course.

Each catalog number represents a unique course and is an indicator of the level of learning for that course, as follows:
- Numbers beginning with 1 and 2 represent lower-division undergraduate courses.
- Numbers beginning with 3 and 4 represent upper-division undergraduate courses.
- Numbers beginning with 5 and 6 represent master’s-level graduate courses.
- Numbers beginning with 7 and 8 represent doctoral-level graduate courses.
- Numbers beginning with 9 represent comprehensive examination and dissertation courses.

RATIONALE
This policy establishes a university course numbering system designed to ensure that all course numbers are based on an established set of principles, easily understood, and reflect industry best practices.

DEFINITIONS
Catalog Number
A catalog number is the four-digit number indicating the level of learning of a course.

Course Number
A course number is a course-specific identifier consisting of a subject (which includes a prefix and, when necessary, a designator) and a catalog number.

Modular Program
Modular programs are offered only in the FlexPath delivery model and are designed to segment components of courses and their respective competencies into smaller, focused modules of direct assessment.
Subject
The subject consists of a prefix that indicates an area of study and, if necessary, a designator that indicates a specific course type.
Examples:
- ED indicates an education course.
- ED-R indicates a residency course in education.

PROCEDURES

I. Assignment of Course Numbers
1. Recommendations for a unique course number are made by the Academic Offerings Steering Committee during the course development process.
2. The registrar reviews and approves new course numbers under the authority of the chief academic officer.
3. Upon approval, the Learner Services and Operations department inputs the unique number, consistent with the definitions, for each course.

II. Course Number Components
1. Prefix
   a. The prefix reflects the course’s general area of study, represented by the academic organization with which it is affiliated in the academic structure (e.g., PSY for psychology courses).
   b. The prefix does not represent the degree level of a course unless directed by industry standard.
   c. The prefix is typically composed of up to four alphabetic characters but may include five alphabetic characters if guided by industry standards and external governance for that academic area of study.
   d. Inactive prefixes should not be reused or redefined unless required by industry standards.
2. Designator
   a. Designators are used only when it is necessary to indicate a specific course type. They appear on the transcript key.
   b. Designators cannot exceed three alphabetic characters.
3. Catalog Number
   a. The catalog number is composed of four numeric characters.
   b. The catalog number represents a unique course and is an indicator of the level of learning for that course.
   c. The catalog number may be followed by an alphabetic character to indicate a course from a modular program.

POLICY OWNERS
Academic Owner: Chief Academic Officer or Academic Offerings Manual Steering Committee
Operations Owner: Learner Services and Operations
