CapraTek: Capella University Project Management Virtual Simulation

0:02 Project managers hold the working world together. A deep understanding of project management is the key to taking your career to the next level.

0:12 You can build that understanding with the project management specializations in Capella University's Bachelor's in Business and Bachelor's in Information Technology.

0:22 Capella's innovative skills-based approach to education will teach you the theory needed to be an outstanding project manager. And then, let you apply that theory to real-world situations in Capella's interactive CapraTek® simulations.

0:36 In these immersive experiences, you act as a project manager in a technology company. Your problem-solving abilities will be tested by real life examples preparing you for the challenges you may face in your career.

0:52 Each simulation empowers you to put theory into practice in hands-on learning scenarios. At CapraTek®, just like in the real world, things do not always go as expected for project managers.

1:06 You will assess the scope of projects and plan accordingly. You will identify and deal with roadblocks as a project progresses. You will balance coaching and mentoring, as you develop intrapersonal skills crucial for successful project management.

1:22 Prepare now, for your future in project management at Capella University. Learn more at capella.edu/projectmanagement
